# Optimise, modernise and augment your organisation with CACI & AWS

aws

**PARTNER**  
Premier Tier  
Services

## **Helping you at every stage of your AWS journey**

**As an AWS Premier Partner, CACI helps organisations securely utilise AWS to drive business efficiency and growth while enhancing and prioritising customer experiences.**

No matter what stage of your cloud adoption journey you're at, our team can support you with:

- 1** Migration
- 2** Modernisation
- 3** DevOps
- 4** Identity resolution & data enrichment
- 5** Customer 360
- 6** Managed services

**Modernisation**

**DevOps**

**Identity resolution  
& data enrichment**

**Customer  
360**

**Managed  
services**

## **Migration**

Moving from on-premises to the cloud or changing cloud platforms isn't easy. At CACI, we've supported large public sector and commercial organisations to successfully implement AWS services to enhance operational efficiency and data management. From developing digital forensics platforms and supporting third-party solution migration to migrating databases from on-premises into AWS, our methodology and best practices help roll out secure environments.

## **Modernisation**

Modernising existing systems and applications is key to improving functionality and user experience. We've helped organisations reap the benefits of optimisation by successfully re-architecting and migrating their platforms. From migrating and upgrading third-party solutions to developing new-and-improved solutions for our customers, we ensure operations run seamlessly, whichever industry they're in.

## **DevOps**

To enhance speed, efficiency and security, our DevOps work combines intricate application and solution development, with operations and accelerators for common architecture patterns including IaaS-based, containerised microservices and fully serverless cloud-native solutions. To enable rapid adoption and onboarding, our AWS Landing Zone accelerator was built as an additional automation pack. Our DevOps expertise enables us to support customers requiring SIEM implementation, data centre cloud integrations or even entire cloud networking.

## **Jezero:** The foundation for cloud at scale

Balancing speed, security, compliance and consistency is one of the toughest challenges in modern cloud. At Identity E2E (a CACI company), we've solved this with Jezero - a secure, rapid platform accelerator that treats cloud enablement like building a hotel.

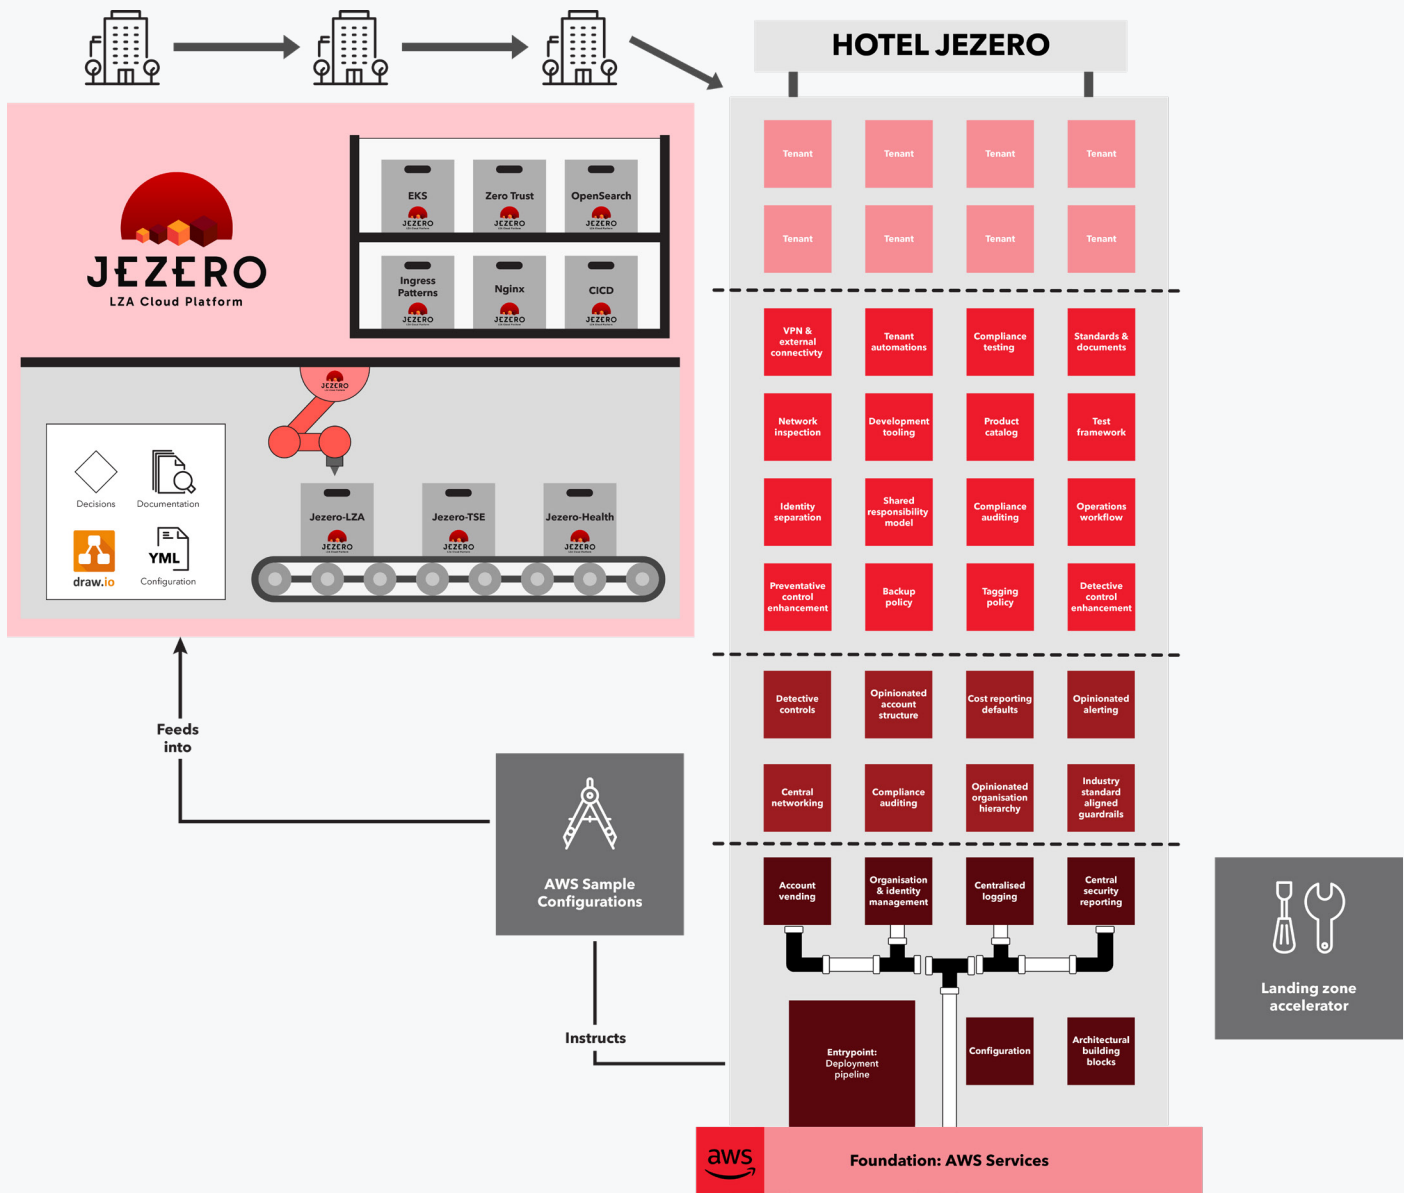

AWS provides the raw materials: powerful services like VPC, IAM, CloudTrail and Config. The AWS Landing Zone Accelerator (LZA) adds structure, acting as a construction kit with automation, guardrails and best practice blueprints for building secure, multi-account environments. Raw tools and templates alone cannot deliver the repeatability, speed, scale, security or compliance that modern organisations need, however.

Jezero is the factory that brings it all together. Built on top of LZA and powered by Infrastructure as Code (IaC) and our templating engine, Jezero automates the creation of secure, compliant, production-ready AWS environments that are consistent, repeatable, governed and developer-ready by design. Every environment comes fully equipped with embedded security controls, centralised identity, monitoring and opt-in modules for developer tooling, including Kubernetes, CI/CD pipelines and AI-driven automation.

This platform accelerator is available in three ready-to-use architectures, giving customers a choice of enterprise-scale foundations, secure enclaves for sensitive data or healthcare-optimised environments tailored to regulatory needs.

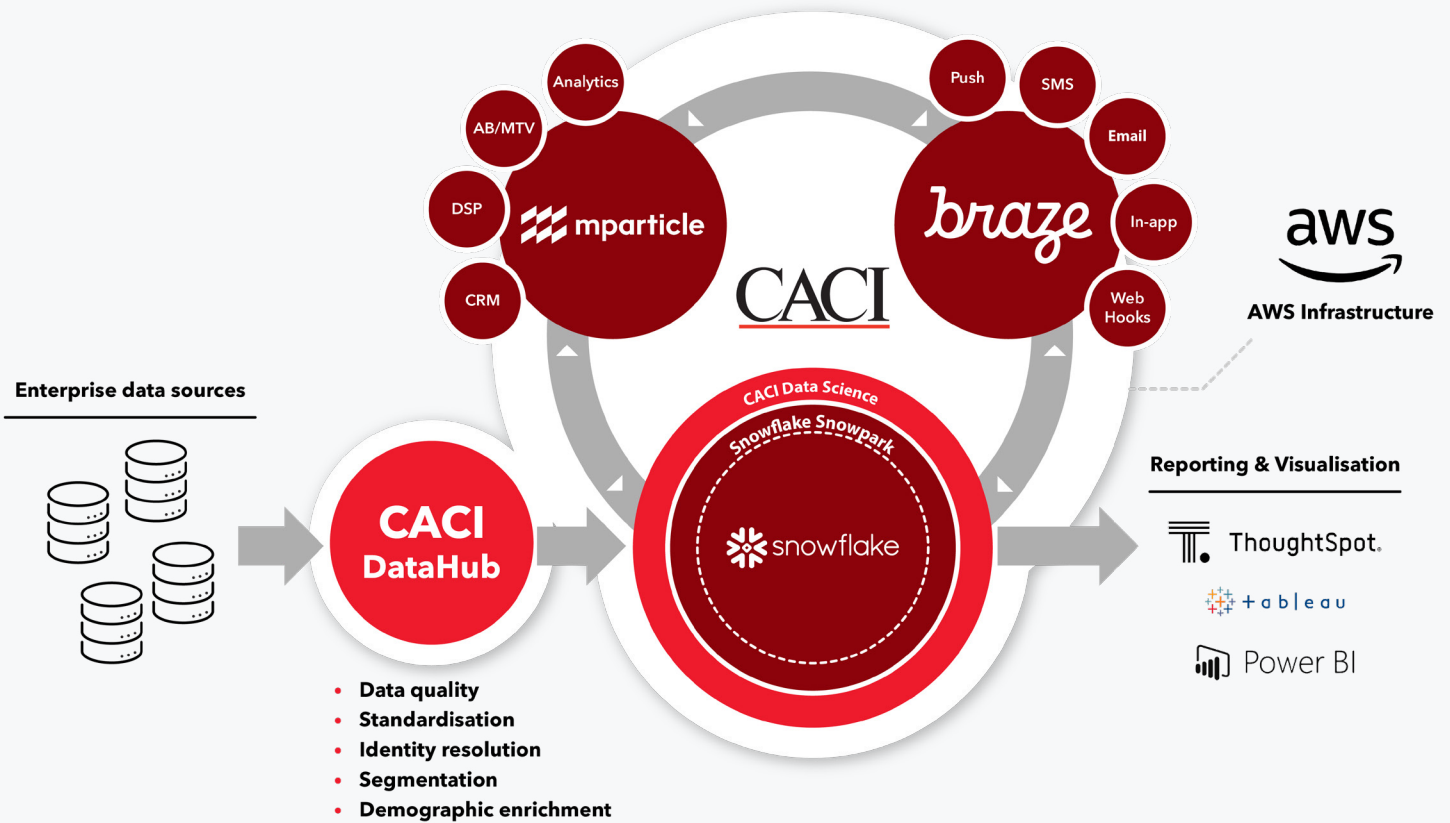

Jezero gives you the system to build, scale and operate securely and compliantly in the cloud with confidence.

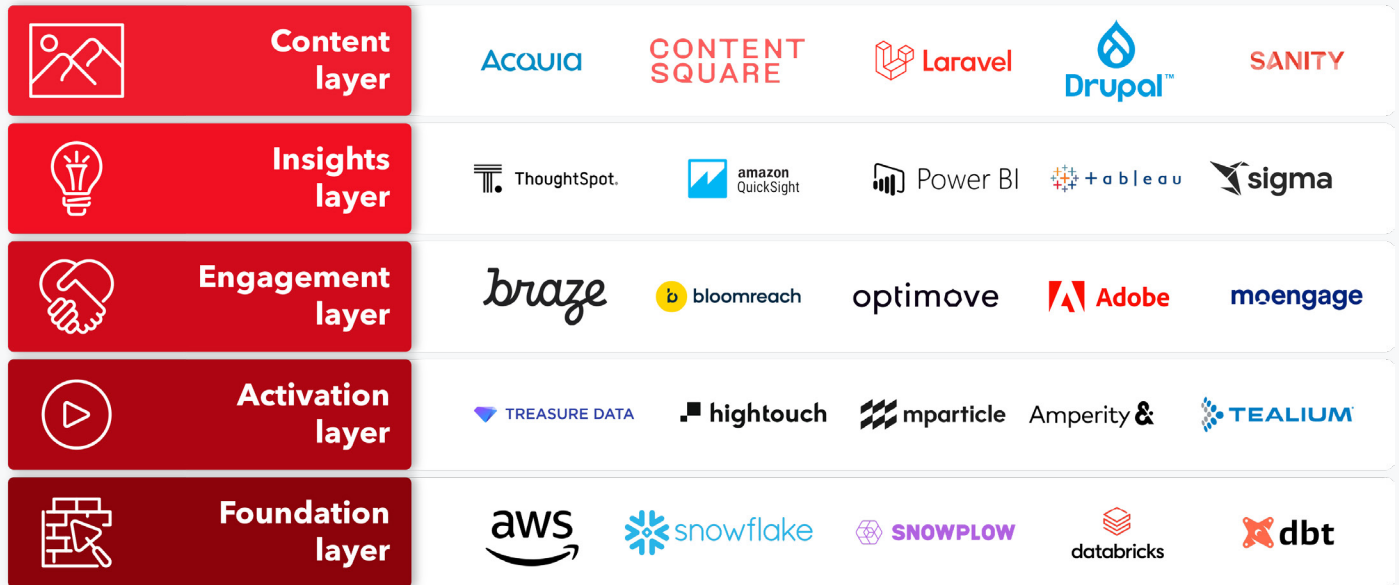

## Identity resolution & data enrichment

Our AWS DataHub solution focuses on identity resolution and data matching to enrich data and equip organisations with more robust insights. A blend of identity resolution, data enrichment and demographic data, our DataHub offers a single view of the customer, their lifestyle and demographics to curate consistent identifiers for each individual customer. If you're in need of customer data cleansing, standardisation, identity resolution and deduplication or transforming your marketing capabilities through a refreshed suite of tools hosted in AWS, CACI can help you do just that.

## Customer 360

As an end-to-end delivery partner, we prove our ability in being the glue that ties together ISV, AWS and SI (Systems Integrator) through this initiative, driving value over the lifecycle of your cloud-based services. For example, we've delivered combined approaches like Braze + Snowflake + AWS + CACI to many of our clients.

## Managed services

Our managed services offering allows continued support of your AWS workloads that is fully transparent on cost and overall security posture. As a result, you'll experience optimal use of AWS throughout the lifespan of your cloud-based services, based on platforms that are reliable, secure, efficient, cost-effective and sustainable.

## Our data and technology experts cover it all

**There's so much you could be doing with AWS, but you need data & technology experts in your area by your side.**

Luckily, we've got specialist teams to advise you across a range of key areas, including:

**Information intelligence**

**Digital transformation**

**Operational systems**

**Data management**

## Information intelligence

Using data and information intelligently is key to making critical decisions. With this in mind, we can help you develop highly secure solutions on AWS. Now, with Identity E2E - a CACI company - our comprehensive cloud solutions are designed to help your organisation harness the full power of cloud technology. Whether you're looking to migrate, manage, or optimise your cloud infrastructure, our team of experts is here to guide you every step of the way.

## Operational systems

From SIEM implementation, cloud integrations, networking and security setups to migrating Census processing systems to AWS and introducing online returns, we'll ensure your solution is fully integrated.

## Digital transformation

From strategy and design to technical selection, delivery and support, we'll guide you through each digital transformation stage. Our support begins with re-platforming your legacy analytical database solutions into AWS and continues with developing a real-time data processing engine and API.

## Data management

Whether it's data enrichment processing and hosting tableau dashboards or building and running geo-spatial APIs for route optimisation within AWS that you need support on, CACI can help you optimise performance and bolster decision-making through data visualisation and science.

## Four ways we've made a difference

Delivering multiple AWS projects for a government agency ranging from on-premises to cloud migration to cloud native development.

Enabling a luxury vehicle company to enhance performance, scalability, system monitoring and security through AWS.

Supporting government agencies to improve their incident management capabilities through a refreshed system, with newly built AWS instances from scratch.

Designing, developing and deploying an application onto an automotive manufacturer's AWS stack, along with building a system to manage applications and send notifications.

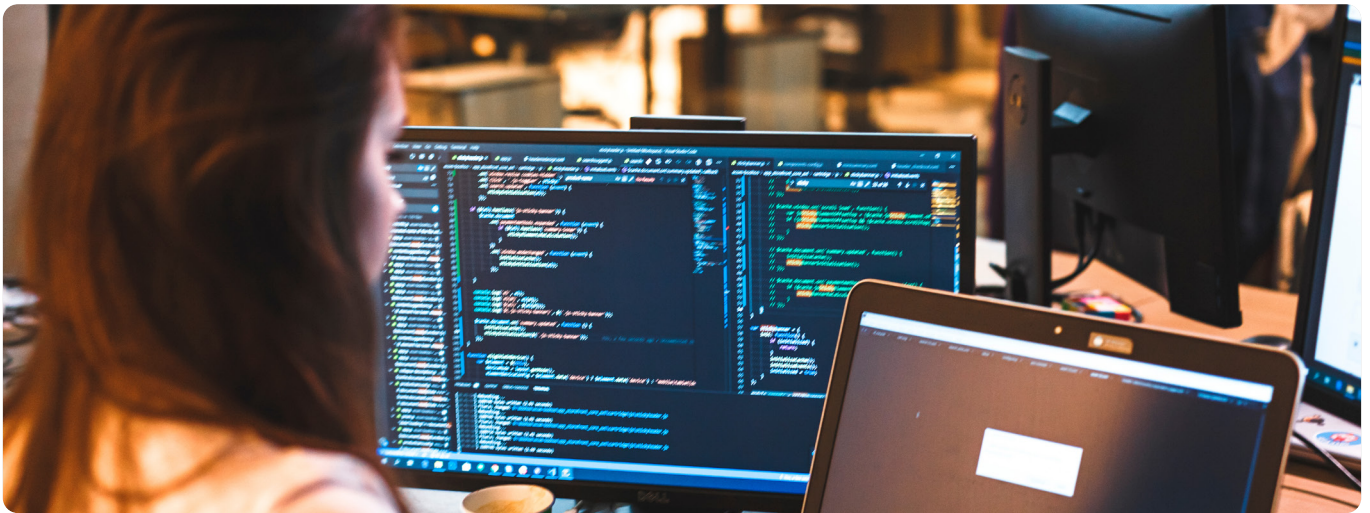

## Trusted by organisations in every sector:

**BOSCH**

**easyJet**

## Certifications & registrations

- ISO27001
- ISO9001
- ISO20000
- ISO14001
- ISO45001
- ISO17025
- ISO17043
- Cyber Essentials Plus
- TiSAX
- DMA DataSeal
- NHS DSPT
- Sarbanes Oxley
- FSQS
- ECOVADIS - Bronze

## Our AWS qualifications

### Partner programs:

- Premier Tier Services
- Solution Provider Program
- Public Sector Solution Provider
- ISV Accelerate
- Trusted Secure Enclave - Vetted Partner Program
- Select Tier Training
- Authorized Training Partner

### AWS certifications:

- Certified Solutions Architect - Professional
- Certified DevOps Engineer - Professional
- Certified Security - Speciality
- Certified Advanced Networking - Speciality
- Certified Big Data - Speciality
- Certified SysOps Administrator - Associate
- Certified Solutions Architect - Associate
- Certified Developer - Associate
- Certified Cloud Practitioner
