Simple
Cloud-based, scalable SaaS solution

Flexible
Integrate OSIRIS with your existing software

Mobile
OSIRIS Student App empowers your students

Analyse
Everything from attendance to achievement

Configure
All the functionality you need; none that you don't

Students expect and demand more from their colleges and universities than ever before. **Has your institution struggled to meet student demands?** We're seeing many where knowledge is siloed, information is stored across disparate systems and understanding of each student's journey is limited. This is resulting in disillusioned students failing to get the most from the education and facilities available to them.
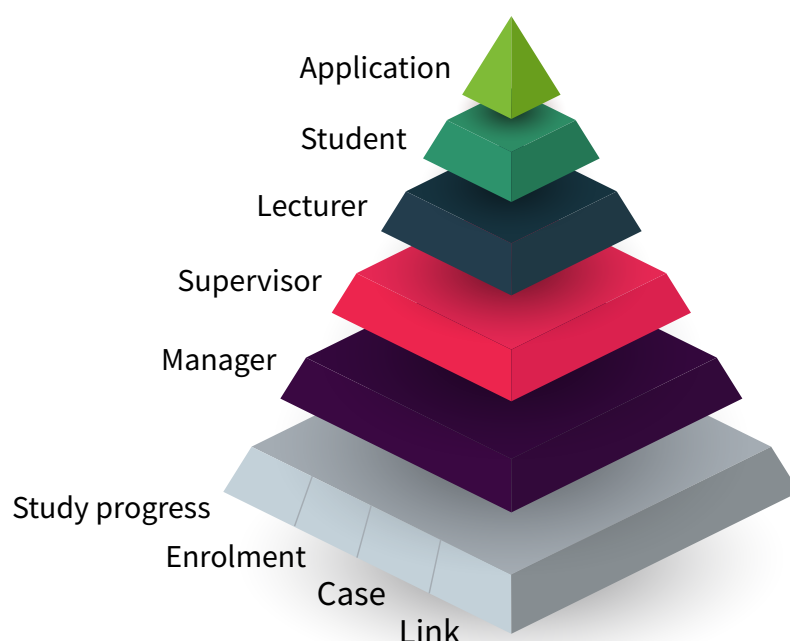

OSIRIS IS CHANGING THIS

OSIRIS is a secure, cloud-based SaaS solution that connects your information and learning systems to provide instant, role-based access for students, educators and administrators. OSIRIS Student App makes it easy to find programmes of work, contact tutors and request support. OSIRIS's built-in analytics package highlights issues with students, courses or departments, making them easy to solve.

BETTER OUTCOMES FOR YOUR STUDENTS

Acting as a central hub for your student information and management, OSIRIS is a flexible solution that can integrate with your existing framework to deliver improved results. You can use as much or as little of it as you need, so if you need help with specific areas, we can help.
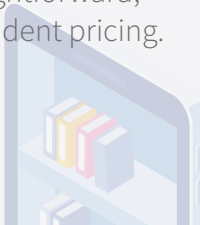

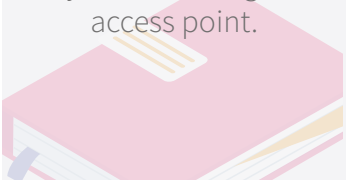

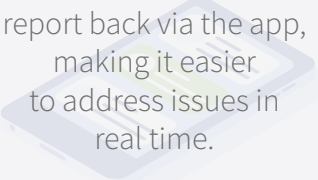

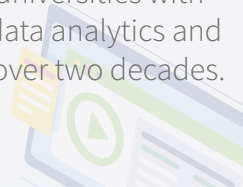

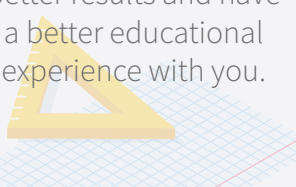

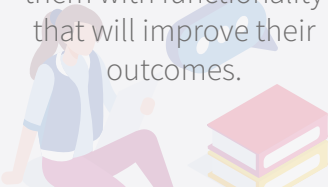

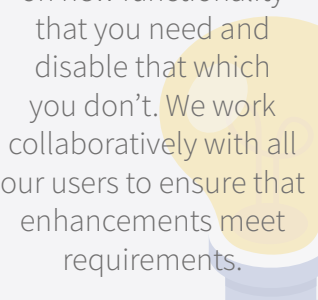

From improving student access to your campus and their tutors by providing them with the white labelled OSIRIS Student App, to gaining rich insight into performance and attendance, OSIRIS supports every aspect of student information management. What's more, OSIRIS will help you in simplifying applications, enrolments and registrations.

Developed with universities and colleges across the Netherlands, OSIRIS has been simplifying student information and management, delivering better outcomes for more than 430,000 students in over 60 colleges and universities.

TRANSFORM YOUR STUDENT MANAGEMENT

We are excited about the benefits that OSIRIS will deliver in the UK:

Meet student expectations

Help your students feel connected, supported and informed throughout their journey with you.

Simplify your IT infrastructure

Secure, cloud-based SaaS technology, OSIRIS delivers reliable performance, scalability to fit your bespoke needs and straightforward, per-student pricing.

Single source of truth

OSIRIS securely integrates with your existing software solutions and all common learning management systems and VLEs to provide you with a single access point.

OSIRIS Student App

OSIRIS's mobile app is used by over 430,000 students across Europe to keep track of their studies and grades, contact tutors and get the most from their education. Tutors can report back via the app, making it easier to address issues in real time.

Software you can rely on

Embedded in over 60 universities and colleges across the Netherlands, OSIRIS is a proven solution supported by CACI, which has been supporting UK colleges and universities with their data analytics and BI for over two decades.

Analytics for students and tutors

Highlighting patterns such as attendance and achievement, OSIRIS makes it easy for institutions to problem solve with their students, helping students to achieve better results and have a better educational experience with you.

A bespoke user experience

OSIRIS is highly configurable, meaning that you have all the functionality that you need and none that you don't. Each student and tutor is different, so empower them with functionality that will improve their outcomes.

Constantly evolving

As a SaaS solution, you will always have the latest version at your fingertips, with the ability to switch on new functionality that you need and disable that which you don't. We work collaboratively with all our users to ensure that enhancements meet requirements.

KEY FEATURES

Seamless communication
Students can contact their tutors instantly via OSIRIS Student App

Course registration
Make your courses easily accessible via OSIRIS

Applications
Manage the applications process through to admissions

Analytics
Analyse individual and group patterns to inform decision making

Real-time information
