

Local authorities have a responsibility to oversee school governors with the requirement to keep detailed records of each governor, including time spent in the position and any requisite training. The IMPULSE governors module enables easy record keeping of governing bodies and the individuals that make them up.

The module further enables the composition of governing bodies, to ensure that each body is comprised of the correct components.

For example, that it has the correct number of parents and representatives from the community, such as from the police force.

Local authorities can use this module to keep track of how long each person has held each post for, too. This makes it easier to be responsive to changes in personnel where necessary. The module is also entirely bespoke, so that you can build it the way that you need it work.

MONITOR

keep track of who is in situ

TIMING

track how long each position has been held for

RESPONSIBILITIES

outline the responsibilities of each position to make applications easier

MEETINGS

track and record all meetings, with venues, agendas and minutes stored in the module

TRAINING

monitor who has been trained and implement training courses where necessary
