

This module integrates with IMPULSE’s schools portal, making necessary information available to governors and teachers, as well as keeping a joined-up record of outcomes.

Furthermore, a record of attendance can be drawn from the school portal in order to help you assess attendance patterns and raise concerns where necessary.

When managing referrals to and from other services, the social inclusion module is the centralised referrals management facilities area. This is where front door access from portals can be put into workflows in relevant business areas.

## Local authorities use this for the following business areas:

Fair access protocol

Children missing education

Elective home education

Early years help

Additional language support

Bespoke referral process, referrals tailored to specific requirements, local initiatives and rule changes

## Looked after children

Helping each child to get the most from their educational opportunities is central to the aims of looked after children and how they are supported. IMPULSE's social inclusion module helps you to create plans in line with each child's Personal Education Plan (PEP).

### The social inclusion module helps you by:

Recording periods of care

Recording details around each child's PEP

Noting what each child wants to achieve

Focussing on grades and activities helps you to ensure they get the access to the things they need

## Attendance

Tracking attendance is crucial for all children.

### The social inclusion module helps you with:

Attendance recording and analysis

Raise concerns where necessary

Penalty Notice Management for lack of attendance

Management of court hearings

## Exclusions

The social inclusion module also assists you in managing exclusions. You can keep a central record of exclusions and can link to a referrals agent for students with behavioural issues – this can help in making alternative provisions for a child where necessary. You can also track, arrange and record all meetings which take place around each child, helping you to keep detailed and accurate information on any exclusion cases.

## Children in employment and entertainment

Where children are employed or in entertainment, it is important to keep of a track of those people who will be interacting with them at school. IMPULSE's social inclusion module helps you to keep track of such information, including chaperone licences.
